

# extreme neighborhood Makeover

meth  
hits  
town

It can be manufactured in the house next door, the apartment upstairs, the adjoining motel room. Explosions and fires often occur because of the dangerous chemicals used in the "cooking" process.

**Made in a lab, there is nothing natural about it. Its all chemicals and household items.**

**Meth is available as a pill, in powder, and as crystal. It is smoked, snorted and injected.**

## OXYCONTIN™

When prescription drugs, including OxyContin™, are used improperly and illegally they are every bit as dangerous as illegal drugs.

### OxyContin

It's a powerful pain reliever that has the same properties as heroin. It contains oxycodone and suppresses the central nervous system. Other products containing oxycodone include Percodan and Percoset! When used improperly these are just as dangerous as illegal drugs!

- 7.8 Million school children report that they use illegal drugs...
- 90% of all school children will be pressured by friends to use drugs...
- By 12th grade 51% of students will regularly drink alcohol
- 7 out of 10 kids report that parents don't talk to them about drugs and alcohol!
